1. INTRODUCTION

NORTEGAS is an infrastructure company that provides competitive and innovative energy solutions to move towards a decarbonized economy and promotes the use of gas as a clean, sustainable and affordable energy source with the aim of playing a relevant role in the framework of the energy transition, prioritizing safety, operational excellence and the creation of shared value.

Protecting, preserving and improving the environment is a strategic priority for the **NORTEGAS** Group.

NORTEGAS is committed to:

- **Guide management towards sustainability and climate neutrality**, innovating in business models that contribute to the reduction of greenhouse gas emissions and,
- **Contribute to the achievement of the Sustainable Development Goals (SDGs)** adopted by the United Nations.

2. SCOPE

This ENVIRONMENTAL POLICY applies to the **NORTEGAS** Group (which is formed by Nortegas Energía Grupo, S.L.U., and its subsidiaries, provided that Nortegas Energía Grupo, S.L.U. has directly or indirectly at least 50% of the share capital) and, in particular, to all its related activities, processes, projects, products, and services, across all business lines and in all geographic areas in which it operates.; and to any external collaborators and suppliers in the performance of their activities in the context of their relationship with the **NORTEGAS** Group ("Nortegas Suppliers").

This POLICY is approved by the Board of Directors of **NORTEGAS** and provides the internal framework for setting improvement targets.

Likewise, this POLICY is periodically reviewed, communicated both to our own personnel and to the collaborating companies that work on behalf of the **NORTEGAS** Group and is available to all stakeholders.

3. COMMITMENTS

NORTEGAS is committed to implementing and developing, as part of its strategy, an **Environmental Management System** in accordance with the **ISO 14001 standard, effectively integrated into all its activities and decisions**, involving all levels of the organization and other interested parties, with the aim of continuous improvement, in order to:

- **COMPLY** with and promote strict compliance with environmental legislation and other voluntary environmental requirements relevant to the organisation, both in its own activities and in those over which it has some influence, taking into account the expectations of different stakeholders and anticipating adaptation to new regulations.
- **PROTECT** the environment by applying the principles of pollution prevention and focusing on climate change adaptation and mitigation, through projects that promote decarbonization and measures to protect biodiversity and ecosystems.
- **INTEGRATE** the environment into risk and opportunity management and strategic decision-making as a pillar of sustainability.
- **RAISE AWARENESS**, encourage environmentally responsible behaviour through the efficient management and responsible use of resources, both our own and along the value chain, involving employees and other stakeholders. And to raise the awareness of all stakeholders through training, information, and education about the environmental impact of the Group's activities.
- **LISTEN**: Integrate stakeholders' environmental expectations into business processes through active, two-way communication that promotes transparency.
- **IMPROVE**: Setting ambitious goals to promote continuous improvement in the organization's environmental performance, integrating environmental criteria into all processes and setting indicators to monitor performance.
- **ENSURE** the performance of the system by continuous evaluation through audits and monitoring by control bodies.
